Validity of certificates tested according to EN 81-20:2014 and EN 81-50:2014

Dear Sir or Madame,

The EN 81-20:2020 and EN 81-50:2020 is published by the Commission in the Official Journal of the European Union (OJ). Due to this publication of the EN 81-20:2020 and EN 81-50:2020 in the OJ, the standards EN 81-20:2020 and EN 81-50:2020 triggers the presumption of conformity to the Lifts Directive 2014/33/EU if the level of safety of the standard is complied with. Furthermore, with this publication, the standards EN 81-20:2014 and EN 81-50:2014 do just trigger the presumption of conformity to the Lifts Directive 2014/33/EU until the 27th of July 2022.

In the European Foreword to EN 81-20:2020 and EN 81-50:2020, the adjustments compared to EN 81-20:2014 and EN 81-50:2014 are described as follows:

- all external referenced standards are now dated
- a new, detailed Annex ZA (reference to Directive 2014/33/EU) was developed
- no technical changes have been made

As no technical changes have been made and therefore no new normative requirements arise, the certificates issued based on or in accordance with EN 81-20:2014 and EN 81-50:2014 are still valid.

Should you nevertheless require a rewriting of certificates with reference to the test basis EN 81-20:2020 and EN 81-50:2020, we are pleased to do so. Please do not hesitate to contact us.
